

# G Series is Back!

New Range – Standard GS Series High Walls

We are pleased to announce that our MSZ-GS Series High Walls have been added to our Air Conditioning line up.

Hailing from our G Series range of high walls (our biggest selling high wall system ever!), the Standard GS Series exude the same robust quality and reliability the market have come to expect when installing Mitsubishi Electric product.

With EcoCore AP Series stock levels coming under pressure recently, the Standard GS Series offers an alternative option to bolster stocks and provide a price competitive difference to your customers.

## Home Comfort, Your Way – Optional Upgrades for Every Lifestyle

The Standard GS Series Heat Pump offers real value while delivering exceptional product quality, reliability and energy efficient heating and cooling.

Combining a classic neutral design with superior energy saving features, the GS Series is the perfect heat pump for where it matters most – in living rooms and bedrooms.

With a host of optional upgrades, from Wi-Fi Control to Plasma Quad Connect high-performance air filtration, the Standard GS Series can adapt to fit your lifestyle.
